NURSING & HEALTH SCIENCES DIVISION

Contact Information

Chair: Krista Harwick, DNP  
E-mail: nhs@lcsc.edu  
Office: SAC 118  
Phone: 208-792-2250  
FAX: 208-792-2062  
Web: http://www.lcsc.edu/nursing

The Division of Nursing and Health Sciences exists to facilitate development of outstanding healthcare providers committed to excellence in the delivery and management of patient centered care. Majors are offered in professional nursing, practical nursing, and radiographic science.

Note: All NHS students must meet health insurance, immunization, and health requirements and are subject to an annual criminal background check. Separate fees apply. Anyone with a prior felony conviction should contact the appropriate licensing board prior to applying for entrance into any NHS Program. The NHS Background Check Policy is found in the Pre-Program Handbook and NHS Student Handbook on the web page. Clinical agencies may have additional requirements for the background check, drug testing and/or health requirements.

TOEFL Scores for Non-Native English Speakers

Applicants to any NHS program for whom English is not the first and native language are required to take the iBT (internet TOEFL) or the IELTS test within two years prior to the date of application. A minimum score of 84 on the iBT test with a verbal sub-score of at least 26 or 6.5 on the iELTS with minimum sub-scores of at least 6 is required.

Expectations of Students

Nursing

(Refer to the current NHS Student Handbook for details and additional criteria: www.lcsc.edu/nursing)

1. Minimum grade requirements and penalties for repeated courses apply. See current year NHS Student Handbook and BSN Program application for details. Admitted students who earn less than the required course grade are dismissed from the program and must apply for re-entry if they meet criteria to do so. Re-entry is not guaranteed.
2. RN and LPN students are required to maintain current Registered Nurse or Practical Nurse licensure in good standing. It is the student’s responsibility to immediately notify the Division Chair in writing of any changes in licensure status.
3. Students must complete and pass an annual background check and maintain currency regarding health and CPR requirements. Policies and requirements are posted to the Division web page and noted in the NHS Student Handbook. Additional fees apply.
4. Students are required to demonstrate professionalism in all classroom and clinical settings.
5. The faculty reserves the right to make program modifications as necessary to meet current professional standards, accreditation criteria, and other policies.
6. Nursing students may petition selected courses for credit by exam or Challenge. (See the NHS Student Handbook, your advisor, and the course instructor for challenge exam information.)
7. All students are required to participate in college and program outcomes testing and assessments.
8. Clinical practicum hours and locations vary. Travel to clinical sites is expected. Students are responsible for their own transportation to clinical facilities and associated lodging/meal expenses.
9. For RN-BSN students, all Nursing (NU) courses must be completed within 4 years after taking the first nursing course or students may be required to meet current program requirements.

Radiographic Science

(Any changes will be reflected in the current NHS Student Handbook: at www.lcsc.edu/nursing)

1. A minimum grade of 75% is required in each RS program course. Students receiving a grade below 75% are required to repeat the course and earn a 75% or better; courses may be repeated one time only. Admitted students who do not earn a minimum grade of 75% in each RS course are dismissed from the program and must apply for re-entry. Re-entry decisions are partially based on clinical and faculty resources.
2. Students must complete and pass an annual background check and maintain currency regarding health and CPR requirements. Current requirements and associated fees are posted to the division web page.
3. Students are required to demonstrate professionalism in all classroom and clinical settings.
4. The faculty reserve the right to make program modifications as necessary to meet current professional standards and accreditation criteria and other policies.
5. All students are required to participate in college and program outcome testing and assessments.
6. Clinical practicum hours and locations vary. Students are responsible for their own transportation to clinical facilities and associated lodging/meal expenses.

**Practical Nursing Program**

(Refer to the current NHS Handbook for details and additional criteria; www.lcsc.edu/nursing (http://www.lcsc.edu/nursing))

1. A minimum grade of C is required in each PN program and support course. Students receiving a grade below C are required to repeat the course and earn a C or better; courses may be repeated one time only. Admitted students who do not earn a minimum grade of C in each PN and program support course are dismissed from the program and must apply for reentry. Re-entry decisions are partially based on clinical and faculty resources.
2. Students must complete an annual background check and maintain currency regarding health and CPR requirements. Current requirements are posted to the division web page.
3. Students are required to demonstrate professionalism in all classroom and clinical settings.
4. The practical nursing faculty reserves the right to make program modifications as necessary to meet current professional standards and accreditation criteria and other policies.
5. All students are required to participate in College and program outcome testing and assessments, including an exit interview.
6. Clinical practicum hours and locations vary. Students are responsible for their own transportation to clinical facilities and associated lodging/meal expenses.

**Special Fees**

**Nursing**

BSN students incur costs for program application, entrance exam testing, textbooks, laboratory supplies, background check and tracking of health requirements, assessment testing, and liability insurance.

**Radiographic Science**

ASRS students incur costs for program application, entrance testing, radiation badges, text books, laboratory supplies, background check and tracking of health requirements assessment testing and liability insurance.

**Practical Nursing**

AAS-PN students incur costs for program application, entrance testing, text books, laboratory supplies, background check and tracking of health requirements, assessment testing and liability insurance.

**Advising**

**Nursing**

Academic advising is provided by BSN faculty and required of all pre-BSN students and those admitted to the Nursing major.

**Radiographic Science**

Academic advising is provided by Radiographic Science program faculty and required of all pre-ASRS students and those admitted to the ASRS program.

**Practical Nursing**

Academic advising is provided by Practical Nursing faculty and is required of all pre-Practical Nursing students as well as students admitted to the Practical Nursing major.

**Preparation for Future Graduate Studies**

**Nursing**

The program provides an educational foundation for continued nursing study at the graduate level.

**Radiographic Science**

The program provides an educational foundation for continued radiographic study at the bachelor's degree level.
Practical Nursing

The program provides an educational foundation for continued nursing study at either the associate or bachelor’s degree level in nursing.

NU-190 DIRECTED STUDY IN NURSING 1.00-3.00 Credits
NU-193 SERVICE LEARNING 12.00 Credits
NU-290 DIRECTED STUDY IN NURSING 1.00-3.00 Credits
NU-291 WORKSHOP IN NURSING 1.00-3.00 Credits
NU-292 SPECIAL TOPICS IN NURSING 1.00-12.00 Credits
NU-295 PRACTICUM IN NURSING 1.00-12.00 Credits
NU-299 RESEARCH ASSISTANTSHIP 1.00-12.00 Credits
NU-306 HEALTH ASSESSMENT 2.00 Credits
The theory component introduces a systems approach using the nursing process as a foundation for conducting a physical health assessment of an individual. The process includes data collection, interpretation, and documentation. The lab portion provides an opportunity to practice and apply techniques of physical assessment.

NU-308 NURSING APPLICATIONS OF GENETICS 1.00 Credit
Utilize previously gained knowledge in genetics to explore nursing interventions in genetic science and legal, ethical, and social implications of genetic manipulation.

NU-309 SKILLS TRANSITION 1.00 Credit
Designed for the LPN transitioning to the BSN role, this course assures competency in the skills required of the professional nurse. Basic skills will be reviewed. The student will learn additional professional nurse skills to include central venous monitoring and dressing changes, CVP measurement, intravenous medication administration, chest tube management, infusion algorithms, blood administration, and basic EKG skills. Prerequisite: Admission to LPN to BSN track.

NU-310 END OF LIFE CARE 1.00 Credit
Increase your knowledge and skills in caring physically and emotionally for dying patients of all ages and their families. Emphasis will be on caring for patients in acute care settings, but hospice care will be discussed. Mourning will also be addressed.

NU-312 PHARMACOLOGY IN NURSING 3.00 Credits
Provides the student with the knowledge necessary to administer medications as a provider of care. Examines principles of pharmacology within the framework of body systems and alterations of health across a lifespan. The physiologic process of drug actions, adverse effects of medication therapy, and safe administration are emphasized.

NU-313 PROFESSIONAL ROLE DEVELOPMENT I: PROVIDER OF CARE 4.00 Credits
Investigates the roles and responsibilities of the professional nurse as provider of care to individuals. Professional standards of practice, principles of evidence-based practice, and the program philosophy are introduced. Fundamental skill development and use of technology in providing nursing care are emphasized.

NU-314 PROFESSIONAL ROLE DEVELOPMENT II: DESIGNER OF CARE 3.00 Credits
Examine the role of the professional nurse as Provider of Care through understanding the theoretical and historical basis for nursing practice. The role of nurse as Provider of Care is expanded to include families as clients. The role of Designer of Care is explored as it relates to the role of the nurse for the client and family. Outcome analysis and evaluation is emphasized as a part of the nursing process.

NU-317 PROFESSIONAL ROLE DEVELOPMENT II: DESIGNER OF CARE 2.00 Credits
The purpose of this course is to explore the foundational ideas of professional nursing practice. The course is framed in the programs outline of Provider & Designer of Care as the basis for practices used in working with the patient and family. Topics include, ethics, interdisciplinary collaboration, legal aspects, Nurse Practice Act, organ donation, models of care, and concepts related to nursing theory. Skills in nurse caring, communication, teaching-learning, prioritization/decision-making, and customer service are also covered.

NU-318 NURSING GENETICS 3.00 Credits
This course provides the RN-BSN student with a basic understanding of genetics from a practicing Registered Nurse point of view. It is designed to help students expand their learning about basic concepts of molecular genetics, gene expression, and genomics as it applies to health issues through the life span and how it influences specific health problems, and ethical concerns. Specific health topics of behavioral health, cardiovascular disease, cancer, immunity, and responses to medications will be applied to nursing issues in diverse contexts. Pre-requisites: BIOL252 (must be a RN-BSN track pre-nursing or nursing student).

NU-325 ALTERATIONS IN HEALTH I 3.00 Credits
Provides the student with a comprehensive theoretical foundation for the management of clients across the lifespan who experience alterations in health. The course builds on knowledge from the biological support courses to examine health problems within the context of medical and nursing sciences. Skills in critical thinking are developed for application to the nursing process as a provider of care.
NU-332 PRACTICUM: ALTERATIONS IN HEALTH I 5.00 Credits
The professional nurse role of provider of care is practiced in a variety of settings with individuals across the lifespan. Integrates basic skill performance, the application of the nursing process, critical thinking and teaching skills to clients experiencing alterations in health. Written and verbal communication within the healthcare team and to patients is emphasized. Graded Pass/Fail only.

NU-341 ALTERATIONS IN HEALTH II 3.00 Credits
Provides the student with a comprehensive theoretical foundation for clients experiencing complex alterations in health. Expands knowledge of the nursing and medical sciences for examining increasingly complex alterations of health for individuals across the lifespan within the context of family. Skills in critical thinking and judgment continue to be emphasized as a provider and designer of care.

NU-342 PRACTICUM: ALTERATIONS IN HEALTH II 5.00 Credits
Expands the professional nurse role of provider of care. Introduces the role as designer of care to clients across the lifespan in the context of their social support system. Integrates advanced skill performance, individualized application of the nursing process, critical thinking and teaching skills to clients experiencing more complex alterations in health, including mental illness. Emphasis on therapeutic communications, and coordination and evaluation of care. Graded Pass/Fail only.

NU-352 PSYCHIATRIC AND MENTAL HEALTH NURSING 2.00 Credits
Introduces the role of the professional nurse in caring for mentally ill individuals in inpatient and community settings. Theoretical knowledge of psychiatric conditions and appropriate nursing and therapeutic interventions are taught. Emphasis on therapeutic communication and treatment modalities to assist patients to attain optimal mental wellness.

NU-354 GERIATRIC NURSING 2.00 Credits
Examines issues related to the provision of holistic nursing care to elderly clients. Emphasis on assessment, health promotion, development and cultural aspects of aging. Chronicity and common syndromes associated with aging, along with theories of aging are examined. The importance of individualized interventions in geriatrics is stressed.

NU-360 TRANSCULTURAL HEALTHCARE 2.00 Credits
Focuses on transcultural nursing and healthcare, with culturally competent care as the central phenomenon to promote health and well-being. This course is designed to help students expand their learning about culture care beliefs, values and practices of specific cultures, subcultures, and marginalized groups. Specific transcultural nursing/health care concepts, principles, and strategies will be applied to contemporary issues in diverse contexts. Writing integrated.

NU-370 TRANSITIONS TO BACCALAUREATE NURSING 1.00 Credit
Develops a conceptual basis of nursing and applies information processing skills to socialize the Registered Nurse or LPN student into the BSN Program. In-depth analysis of the philosophy of the BSN program, nursing history, and theoretical frameworks for nursing practice. Introduction to professional nursing roles, social and cultural dimensions of practice and current issues affecting the nurse, the profession, and society. Pre-requisite: RN licensure or permission of instructor.

NU-390 DIRECTED STUDY IN NURSING 1.00-3.00 Credits
NU-392 SPECIAL TOPICS IN NURSING 1.00-3.00 Credits
NU-399 RESEARCH ASSISTANTSHIP 1.00-3.00 Credits
NU-407 MATERNAL HEALTH THEORY 2.00 Credits
Provides a theoretical framework for the care of pregnant women, and families in a variety of settings. Utilizes the nursing process to explore therapeutic nursing interventions and the roles of the professional nurse. Pre-requisite: Acceptance to BSN Program or permission of instructor and successful completion of all previous nursing classes with a grade of C or above.

NU-408 PEDIATRIC HEALTH THEORY 2.00 Credits
Provides a theoretical framework for the care of children, and families in a variety of settings. Utilizes the nursing process to explore therapeutic nursing interventions and the roles of the professional nurse. Pre-Requisite: Acceptance to BSN Program or permission of instructor and successful completion of all previous nursing classes with a grade of C or above.

NU-413 PROFESSIONAL ROLE DEVELOPMENT II: MANAGER/COORDINATOR OF CARE 3.00 Credits
Explores the roles and responsibilities of the professional nurse as manager/coordinator of care for diverse clients and in the healthcare system. The exploration of nursing and management theories provides a basis for the roles of patient advocate, interdisciplinary coordinator, and team manager. Management skills emphasized in this course include management of quality nursing care through outcome and evidence-based evaluation, collaboration, and collegiality.

NU-414 PROFESSIONAL ROLE DEVELOPMENT IV: MEMBER OF THE PROFESSION 2.00 Credits
Develops and refines the role of the baccalaureate nurse as a leader within the profession and society. Professional and societal issues are used as a forum for the development of personal goals for lifelong learning. Leadership skills include advocacy, communication, and political awareness.

NU-415 FAMILY HEALTH NURSING 4.00 Credits
Provides a theoretical framework for the care of children, pregnant women, and families in a variety of settings. Utilizes the nursing process as a foundation to explore therapeutic nursing interventions and the roles of the professional nurse.

NU-416 PRACTICUM IN FAMILY HEALTH 3.00 Credits
Applies theoretical knowledge in the care of children, pregnant women, and families in a variety of settings. Integrates basic skill performance, the application of the nursing process, critical thinking and teaching skills.
NU-417 FAMILY HEALTH FOR THE LPN 2.00 Credits
Provides an opportunity for the Practical Nurse to build upon and reinforce maternal/newborn and family health nursing knowledge gained through prior PN coursework. Provides an opportunity to apply theoretical knowledge and basic nursing skills within the acute care family health setting. Pre-requisite: Admission to the LPN-BSN Track.

NU-418 FAMILY NURSING 2.00-3.00 Credits
Provides a theoretical framework for the care of children, pregnant women, and families in a variety of settings. Utilizes the nursing process to explore therapeutic nursing interventions and the roles of the professional nurse. This course may be a theory or a combined theory/clinical option depending on student learning needs. Pre-Requisite: Acceptance to PN-BSN Program or permission of instructor and successful completion of all previous nursing classes with a grade of C or above.

NU-421 PROFESSIONAL ROLE DEVELOPMENT V: PREPARATION FOR PRACTICE 2.00 Credits
Synthesizes knowledge from all previous BSN courses; thus preparing students for the provision of safe care during their guided preceptorship experience. Knowledge and skills in critical thinking and judgment continue to be emphasized, particularly in relation to preparation for graduation and licensure. Expands knowledge regarding NCLEX style test taking. Pre-requisite: Completion of all prior nursing courses or permission of instructor.

NU-440 COMMUNITY HEALTH NURSING 3.00 Credits
Explores the theoretical and conceptual foundations of community and public health nursing. Community assessment, population-focused practice, epidemiology, and health promotion are examined in a rural, regional, and global context.

NU-442 PRACTICUM IN COMMUNITY HEALTH 2.00 Credits
Provides an opportunity to integrate theoretical and conceptual foundations with clinical practice focusing on the community as a client. Develops community assessment, analysis, and diagnosis as the basis for implementation of community-level interventions for health promotion in diverse community settings. Explores collaboration with partners in the delivery of healthcare to a community. Graded Pass/Fail only.

NU-445 NURSING RESEARCH II 2.00 Credits
Develops basic research concepts and processes that are necessary for the professional nurse to participate in an evidence-based practice. Emphasis on the process of retrieval, appraisal, and synthesis of evidence in collaboration with other members of the healthcare team to improve patient outcomes. Pre-requisite: Acceptance to BSN program or permission of faculty; PSYC 300 or MATH 253 or equivalency with a grade of ‘C’ or better.

NU-446 NURSING RESEARCH II 2.00 Credits
Continued development of research concepts and processes that are necessary for the professional nurse to participate in an evidence-based practice. Emphasis on models for applying evidence to clinical practice with a focus on improved patient care/outcomes, nursing practice, and healthcare systems. Pre-requisites: Acceptance to the BSN program or permission of faculty and completion of NU 445.

NU-449 HEALTHCARE POLICY AND ECONOMICS 2.00 Credits
Provides the student with a basic understanding of the world of healthcare from an economic and political point of view. The student will gain an understanding of the business and financial environments impacting healthcare today, general economic and financial concepts, budgeting processes, the influence of economic and political factors on access to healthcare, and the use of financial information in the decision-making process.

NU-477 GUIDED PRECEPTORSHIP 4.00 Credits
Synthesizes the role of the professional nurse as a Provider/Designer/Manager of care to individuals and groups through application of all previous clinical and theoretical coursework. In a supervised setting, the student’s competence in nursing skills and the nursing process is assessed followed by advancement to an independent preceptorship in an assigned clinical setting. The professional nurse roles of provider of care, designer/manager/coordinator of care, and member of the profession are emphasized.

NU-478 PRACTICUM IN LEADERSHIP FOR THE REGISTERED NURSE 2.00 Credits
Facilitates the application of theoretical leadership and management concepts while working with a nurse manager or leader in a variety of settings. Emphasis on change, communication, current practice and care delivery issues, and development of professional leadership skills for the registered nurse.

NU-480 NEONATAL RESUSCITATION 1.00 Credit
This course is intended primarily for persons who may be required to assist with the resuscitation of a newborn infant in a hospital setting. The material used in this course is provided by the American Heart Association of the American Academy of Pediatrics. Pre-requisite: Permission of the instructor.

NU-490 DIRECTED STUDY IN NURSING 1.00-3.00 Credits
NU-491 WORKSHOP IN NURSING 1.00-3.00 Credits
NU-492 SPECIAL TOPICS IN NURSING 1.00-12.00 Credits
NU-495 PRACTICUM IN NURSING 1.00-12.00 Credits
NU-499 RESEARCH PROJECT AND SEMINAR IN NURSING 1.00-12.00 Credits
PN-100 FOUNDATIONS OF PRACTICAL NURSING 2.00 Credits
Explores the role of the practical nurse, including legal and ethical issues, patients’ rights, standards of practice, and legislative/economic influences in the delivery of healthcare services. Employment-seeking skills and responsibilities of healthcare employees, including confidentiality, are discussed. The program philosophy is introduced, as are opportunities for continued learning in nursing.
PN-104 PRACTICAL NURSING THEORY I 4.00 Credits
The fundamental principles underlying nursing care are presented in this course. Students develop knowledge and theoretical skills necessary to care for patients of all ages. This course introduces the student to disease processes and nursing interventions in the care of patients with alterations in select body systems. Special needs and care of the geriatric patient is integrated throughout. The nursing process, principles of documentation, health assessment, nutrition, medication administration and patient safety issues are included.

PN-105 PRACTICAL NURSING PRACTICUM I 3.00 Credits
The practical nursing student will develop competency in basic psychomotor and assessment skills and apply theoretical knowledge while caring for adult patients in the structured health care setting. Experiences provide the student with opportunities to develop and enhance medication administration and health assessment. Graded P/F only.

PN-200 PRACTICAL NURSING THEORY II 2.00 Credits
This course builds on theoretical concepts from Practical Nursing I (PN 104) to provide nursing care for individuals experiencing more complex, less stable conditions across the life span. Students study the common diseases and disorders of patients and the appropriate nursing measures to restore health or facilitate adaptation. Specific focus is on acute care.

PN-205 PRACTICAL NURSING PRACTICUM II 5.00 Credits
This course provides the practical nurse student the opportunity to practice and refine psychomotor and assessment skills and apply theoretical knowledge while caring for patients in a variety of healthcare settings.

PN-206 PRACTICAL NURSING PRACTICUM II 4.00 Credits
This course provides the practical nurse student the opportunity to practice and refine psychomotor and assessment skills and apply theoretical knowledge while caring for patients in a variety of healthcare settings. Pre-Requisites: Admission to LPN Program and passing semester 1 of the PN program.

PN-210 MENTAL HEALTH NURSING THEORY 2.00 Credits
This course introduces the practical nursing student to the concepts of mental health and illness and care of the patient with common psychological disorders and associated therapies. Death, dying and grief concepts will be included.

PN-213 PRACTICAL NURSE ROLE DEVELOPMENT 4.00 Credits
Investigates the roles and responsibilities of the practical nurse as provider of care to individuals. Professional standards of practice, principles of evidence-based practice, and the program philosophy are introduced. Fundamental skill development and use of technology in providing nursing care are emphasized. Pre-requisites: Admission to LPN Program or permission from the Instructor.

PN-251 PRACTICAL NURSING THEORY III 3.00 Credits
This course builds on the theoretical concepts from Practical Nursing I and II (PN 104 and 200). Students will demonstrate knowledge of the LPN management role. This course meets the requirements of the Rules and Regulations of the Idaho Board of Nursing for LPNs to function in a management role.

PN-261 MATERNAL HEALTH THEORY 2.00 Credits
This course introduces students to principles of appropriate care for patients in the antepartal, labor, and postpartal stages. Care associated with normal conditions, awareness of abnormal signs and symptoms, and appropriate nursing care measures are included. Concepts of health maintenance and client teaching will be stressed.

PN-262 CHILD HEALTH THEORY 2.00 Credits
This course will focus on the pediatric client from infant to 18 years of age. This course introduces students to principles of appropriate care for pediatric clients. Care associated with normal conditions, awareness of abnormal signs and symptoms, and appropriate nursing care measure are included. Concepts of health maintenance, growth and development, and client teaching will be stressed.

PN-292 SPECIAL TOPICS IN PRACTICAL NURSING 1.00-12.00 Credits

RI-300 CT PROCEDURES/PROTOCOL 4.00 Credits
Examination of Computed Tomography (CT) procedures and protocols to include positioning, acquisition methods, parameter selection, and special procedures.

RI-302 MRI PROCEDURES/PROTOCOLS 4.00 Credits
Protocols and procedures to include pulse sequences, data manipulation, special procedures, imaging parameters, imaging options, image quality and contrast values.

RI-305 SECTIONAL IMAGING 3.00 Credits
Overview of axial, coronal and sagittal imaging of the human body as demonstrated via CT and MRI images.

RI-310 CT PATHOLOGY 3.00 Credits
Basic principles of pathology and computed tomography (CT) of specific disease processes. Selection of proper imaging protocols related to pathology will also be examined.
RI-312 MRI PATHOLOGY 3.00 Credits
Basic principles of pathology and magnetic resonance imaging (MRI) of specific disease processes. Selection of proper imaging protocols related to pathology will also be examined.

RI-320 CT PHYSICS/INSTRUMENTATION 3.00 Credits
Examination of Computed Tomography (CT) physics and instrumentation to include system operation and components, image processing and display, image quality, artifact recognition, and quality.

RI-322 MRI PHYSICS/INSTRUMENTATION 3.00 Credits
Examination of MRI physics and instrumentation to include electromagnetism, radiofrequency system, gradient system, nuclear magnetism, tissue characteristics, spatial localization artifacts, and quality control.

RI-380 COMPUTED AND DIGITAL RADIOGRAPHY 3.00 Credits
Review of the history of digital image acquisition. Introduction of radiology information systems and their role in hospital information systems (HIS) and exploration of the importance of digital image communication in medicine (DICOM) in a radiology department.

RI-390 DIRECTED STUDY IN RADIOGRAPHIC IMAGING 1.00-3.00 Credits

RI-400 CT ADVANCED OPERATIONS 3.00 Credits
The student will examine CT procedures/protocol and review the primary aspects of the current ARRT CT exam to include: 1) Patient Care, 2) Imaging procedures, 3) Physics and instrumentation, and 4) Clinical requirements.

RI-402 MRI ADVANCED OPERATIONS 3.00 Credits
The student will examine advanced MRI procedures/protocols and review the primary aspects of the current ARRT (MRI) and/or ARMRIT exams to include: 1) Patient care; 2) Imaging procedures, 3) Physics and instrumentation, and 4) Clinical requirements.

RI-480 CT INTERNSHIP 1.00-14.00 Credits
Build on knowledge and skills obtained from professional experience and class work and apply these concepts to the performance of clinical procedures in the imaging environment. Each internship will adhere to ARRT (CT) clinical requirements and the needs of each student. Objectives will be determined through collaboration of the LCSC radiography faculty, the student, the site preceptor and in accordance with ARRT (CT) clinical requirements.

RI-482 MRI INTERNSHIP 14.00 Credits
Build on the knowledge and skills obtained from professional experience and class work and apply concepts to the performance of clinical procedures in the imaging department. Each internship will adhere to ARRT (MRI) and/or ARMRIT clinical requirements and the needs of each student. Objectives will be determined through collaboration of the LCSC radiography faculty, the student, the site preceptor, and in accordance with ARRT (MRI) and/or ARMRIT requirements.

RI-484 MDI: CLINICAL PORTFOLIO 1.00 Credit
The clinical portfolio process allows MDI students who have already taken & passed the ARRT Certification Exam for their specialty/emphasis area to demonstrate clinical competency. Pre-requisite: Admission to MDI Program.

RI-490 DIRECTED STUDY IN RADIOGRAPHIC IMAGING 2.00-3.00 Credits

RI-492 SPECIAL TOPIC: RADIOGRAPHIC IMAGING 1.00-3.00 Credits

RS-201 MEDICAL TERMINOLOGY FOR RADIOGRAPHERS 2.00 Credits
This online course serves as an introduction to Medical Terminology. The emphasis will be on the word-building process, medical abbreviations and symbols, as well as terminology used for specific radiologic procedures and diagnostic reports. Pre-requisites: Admission to the Associate of Science in Radiography program and/or permission of the instructor.

RS-220 PATIENT CARE IN RADIOGRAPHY 2.00 Credits
Addresses principles and practices of patient care in the radiographic setting. Standards of patient care for the radiographer as a member of the health care interdisciplinary team in the hospital and clinic setting will be presented, with a focus on medical ethics and legal issues pertaining to the radiography setting. Students will demonstrate contrast media administration, patient preparation for radiographic examinations and safety awareness. Pre-requisite: Admission to the Associate of Science in Radiography program and/or permission of the instructor.

RS-221 RADIOGRAPHIC METHODS I 1.00 Credits
Core positioning practices in radiography. Simulated X-ray exams will be performed on upper and lower extremities, chest and abdomen. Phantom anatomical models may be imaged and film critique will be performed on each positioning protocol. There may be a few visits to local clinical sites to aid in understanding equipment descriptions, manipulations of locks and control panels, ext (time permitting). Pre-requisite: Admission to the Associate of Science in Radiography program and/or permission of the instructor.

RS-222 RADIOGRAPHIC METHODS II 3.00 Credits
This is a lecture/laboratory course of principles and practices of cranial radiography - including skull, facial bones, paranasal sinuses and mandible. Anatomy and positioning of the spinal cord will also be introduced. Techniques of patient care, positioning, technique, film critique, anatomy and pathology will be presented. Observations and practice will occur in the laboratory classroom.

RS-224 RADIOGRAPHIC PHYSICS 3.00 Credits
This course provides the radiographic student a general understanding of the physics necessary to create radiographic images. Grasp of this material will help the student to optimize radiographic images, or to correct suboptimal images. Digital radiographic principles and practice are incorporated throughout the course. Pre-requisites: Admission to the Radiographic Science program.
RS-240 QUALITY ASSURANCE AND TECHNICAL IMAGING 3.00 Credits
A technical overview of radiography to include the x-ray tube, tube rating charts, tube failure, x-ray physics, x-ray production, x-ray machine components, x-ray machine circuits, beam restriction devices, grids, geometric factors, fluoroscopy, x-ray technique, digital/computer imaging, and quality control criteria. Pre-requisite: Admission to the Associate of Science in Radiography program and/or permission of the instructor.

RS-242 CR/DR APPLICATIONS 1.00 Credit
Review the history of digital image acquisition as well as an introduction of Radiology Information Systems and their role in hospital information systems (HIS) and exploration of the importance of digital image communication in medicine (DICOM) in a radiology department. Pre-requisite: Admission to the Radiographic Science program.

RS-255 RADIOGRAPHIC PATHOLOGY 3.00 Credits
Basic principles of pathology and radiographic appearance of specific diseases. Selecting proper modalities related to disease processes, technical factors, and determination for retaking radiographs that might be acceptable under different circumstances. Co-requisites: RS 260 and RS 265.

RS-258 SPECIAL PROCEDURES I 2.00 Credits
This lab-based course focuses on the principles and practices of special procedures most commonly performed in our regional hospitals. Mobile radiography and trauma Imaging will be discussed. Special emphasis will be placed on fundamentals of assisting the Radiologist during fluoroscopic examinations. Pre-requisite: Admission to Radiographic Science program.

RS-261 APPLIED RADIOGRAPHY I 8.00 Credits
Core positioning practices in radiography demonstrated in the clinical environment. Student begins to obtain competencies for Chest, Abdomen, Upper extremity and Lower extremity radiographic examinations.

RS-265 SPECIAL PROCEDURES AND IMAGING MODALITIES 3.00 Credits
This internet-based course focuses on the principles and practices of special procedures and advanced imaging modalities. Mobile radiography and trauma imaging will be discussed. Special emphasis will be placed on fundamentals of Computed Tomography (fulfilling 2007 updated ASRT Guidelines). Techniques of tomography, myelography, angiography, and interventional radiography will be presented. An introduction to sonography, nuclear medicine, and digital radiography will also be given.

RS-290 DIRECTED STUDY IN RADIOGRAPHIC SCIENCE 1.00-3.00 Credits
RS-292 SPECIAL TOPIC IN RADIOGRAPHIC SCIENCE 1.00-12.00 Credits
RS-330 RADIObIOLOGY 3.00 Credits
Review of cell structure and function, ionizing radiation induced cell damage, history of radiation disease research, and subsequent development of radiation protection guidelines. Co-requisite: RS 332.

RS-332 APPLIED RADIOGRAPHY IV 9.00 Credits
Core positioning practices in radiography demonstrated in the clinical environment. Continuation of RS 272 to include all needed competency exams required by the AART. Co-requisite: RS 330.

RS-355 REGISTRY REVIEW 2.00 Credits
This course provides an overview of radiographic terminology, anatomy, positioning, ethics, legal principles, technique, physics, radiobiology special procedures, quality assurance, patient care, and professionalism related to the performance of entry-level radiography in preparation for taking the American Registry of Radiologic Technology (ARRT) Radiography (R) exam.

RS-358 SPECIAL PROCEDURES II 1.00 Credit
This hybrid course focuses on the principles and practices of special procedures and advanced imaging modalities. Topics include: the history and development of computed tomography (CT), and introduction to diagnostic ultrasound (US), bone densitometry, mammography, MRI, radiation therapy, and nuclear medicine. Pre-requisite: RS 258.

RS-362 APPLIED RADIOGRAPHY II 10.00 Credits
Core positioning in radiography demonstrated in the clinical environment. Continuation of RS 261 to include all needed competency exams required by ARRT.

RS-363 APPLIED RADIOGRAPHY III 10.00 Credits
Core positioning practices in radiography demonstrated in the clinical environment. Continuation of 362 to include all needed competency exams by the ARRT.

RS-390 DIRECTED STUDY: RADIOGRAPHIC SCIENCE 1.00-3.00 Credits
RS-392 SPECIAL TOPIC: RADIOGRAPHIC SCIENCE 1.00-12.00 Credits
RS-460 PHARMACOLOGY FOR IMAGING PROFESSIONALS 2.00 Credits
RS 460 is a 2 credit course that explores the principles of the pharmaceuticals needed to perform today's medical imaging processes along with the indications and contraindications of each; the role the imaging professional plays; the optional routes to administer the products; the Pharmacokinetics coverage that describes how drugs are absorbed, metabolized, distributed, and eliminated; and lastly the emergency procedures in response to adverse reactions to contrast media. Pre-requisite: Admittance into the Associate of Science Radiographic Science program and Junior standing or permission from the instructor.
RS-499 SENIOR CAPSTONE: IMAGING ETHICS 3.00 Credits
RS 499 is a 4 credit course that explores professional ethics that must be maintained and adhered to in a diagnostic imaging department. Familiarity of professional and personal codes of ethics and understanding will be discovered through online discussion, case studies, and group work. This course prepares individuals to motivate health care professionals to function and operate their specific tasks at their best abilities and improve efficiency in health care facilities. Students will integrate theory and practice from the entire curriculum to explore ethical issues in Radiographic Science. Pre-requisite: Admittance into the Associate of Science Radiographic Science program and Junior standing or permission from the instructor.
