

COMPUTER SCIENCE BA/BS

The Computer Science program is designed to prepare students for industry or graduate work in Computer Science or Management Information Systems. The Computer Science major uses a traditional computer science curriculum, with requisite mathematical rigor, and is based on the Association of Computing Machinery (ACM) core curricula recommendations. The curriculum is designed to be very flexible and allow students to use credits from the Associates of Information Systems and Information Systems Analysis towards this degree. The degree is also designed to allow students to use Biology courses towards the degree for students who are interested in pursuing a Bioinformatics degree in graduate school.

The goals of the Computer Science program are to provide students with learning experiences in both the classroom and laboratory so that they will be **well-prepared** to:

- o Think critically and apply knowledge in novel contexts;
- o Design and implement object-oriented and imperative programs;
- o Understand algorithms and data structures;
- o Understand relational databases, operating system kernels, and network software development;
- o And, perform basic laboratory analysis.
