

# HEALTH STUDIES BA/BS

The health studies major is designed to provide students with a solid foundation in health sciences and to allow for an individualized path to completion of a bachelor's degree. Flexibility of the degree allows students to tailor coursework based on interests and goals in the health care arena. Upon completion of required science courses, students select coursework from multiple content areas such as biology, business, health, psychology, and communications. Graduates can work in a variety of health care settings or pursue graduate health professions programs.
