

PHYSICAL SCIENCES MINOR

The Physical Science minor provides students with a foundational understanding of the physical world through the principles of scientific inquiry. Focusing on the disciplines of Chemistry and Physics, the minor emphasizes laboratory techniques and hands-on investigation. It offers an opportunity to deepen scientific knowledge and strengthen critical thinking skills, making it valuable for science and mathematics majors as well as students in other fields who wish to enhance their academic program. Students pursuing teacher certification should consult their academic advisor and the Education Division before selecting this minor.

Program Requirements

Code	Title	Credits
Select at least 8 credits from Chemistry (CHEM) and Physics (PHYS) ¹		16.00
Program Electives		
Select any course from the Natural Science Division except NS-150.		4.00
Total Credits		20.00
